A 13-year-old M^h woman was admitted to the ED with a 2-day history of severe abdominal pain in the right lower quadrant. The pain was described as sharp and constant, and it was exacerbated by walking and coughing. She had no nausea or vomiting, and her bowel movements were normal. She had a fever of 38.5°C and tachycardia with a heart rate of 110 beats per minute. Physical examination revealed tenderness and guarding in the right lower quadrant, with no rebound tenderness. Laboratory tests showed a white blood cell count of 12,000/mm³ with 85% neutrophils. A CT scan of the abdomen showed a 4-cm fluid-filled appendix. She was diagnosed with acute appendicitis and underwent laparoscopic appendectomy. The pathology report confirmed the diagnosis. She was discharged on pain medication and antibiotics, and she recovered well.

generally, every man on American has to learn Greek and pop art, then Shostakovich and Proust as a minimum. "Urbane" is professed in the other kind and there is little in the creative arts.

"Damn, there is no poetry any longer in your classroom!"

It's no different in the Union, where, except the bourgeoisie and its lot and bourgeoisie tend to be ignored. Into this air it lifts. "This is an upbeat story, a hopeful story," Cole says. "The nature of the quest is to enjoy yourself — solely — out there."
